### ImportExcelFiles program for KeyCreator 8.X only!

#### Use this program at your own risk!

## **Program description:**

This program imports a data file organized in rows and columns separated by a definable character like a comma or semi colon. Once the file is selected the text height will drive the size of the table. Placement can be achieved by any of the four corners of the table. The setup dialog box will remember the settings.

#### The Setup Dialog Box

| Import Settings  |   |   |
|--|---|---|
| Table Settings         TopLeft         TopRight         BottomLeft         BottomRight         7       Line Color         3       Line Width         4       Line Type | Text Attributes         Font Name       Smooth         Text Height       0.250000         Text Aspect       0.750000         Text Color       15         File Options       C:\Import | General Settings Create as Composite Composite Name: Table Source File Separation Character:  tData.csv |
| Registered to: Hans Wink   | ler   | Cancel  |

Below is some additional help; items that are self explanatory are not listed.

# **Table Settings:**

Here you can set up the line attributes and the placement of the table.

### **Text Attributes:**

Here you can set the text attributes that populate the table.

### **General Settings:**

Here you can specify whether the table is to be created as a composite, and if so add the composite name. You also must enter the separation character that separates the words in the data file. Empty placeholders in the data file are allowed e.g. Quantity;Material;Vendor;;;Remarks, however when the table is imported into KeyCreator, the empty placeholders are converted to dashes.

# **File Options:**

Here you can specify a permanent data file path. If checked the program will always try to open the specified file for import. Should the file not exist, a File Open Dialog will aid in the selection of the data file

## **Registration Information:**

You will be given the opportunity to register the program at every startup. The following Dialog will appear:

| Kubotek KeyCreator          |    |  |  |  |
|-----------------------------|----|--|--|--|
| Would you like to register? |    |  |  |  |
| Yes                         | No |  |  |  |

If you click No you are in Trial mode. Trial mode works for **5 days** after your first startup.

If you click Yes, the following Dialog will appear:

| <b>Registration Dial</b>                                    | og Box:           |              |
|---|-------------------|--------------|
| Enter your Name   | :                 |              |
|   |                   |              |
| Enter the unlocki   | ng key:           |              |
| 0   |                   |              |
| Enter your Name a<br>an unlocking key,<br>the unlocking key | otherwise enter y | our Name and |
| Register  | Save              | Cancel       |

Follow the description in the Dialog by entering your name and pressing the Save button.

After clicking Save, the following Dialog will appear:

#### Do not overwrite or edit the ImportExcelFiles.lic file, or the registration will fail.

After payment is received the unlocking key will be emailed to you. When you receive the unlocking key, simply fill in your name and your unlocking key and press Register. Remember that Name and unlocking key are case sensitive.

# Cost:

This program may be purchased for \$19.95 US Dollars
