

NoteImport program for KeyCreator 9.X only!

Use this program at your own risk!

Program description:

This program imports text files to create a Note or Label from it. All import text settings are customizable and are remembered once the OK button is pressed.

The Setup Dialog Box

The screenshot shows a dialog box titled "Note Import Text Attribute Settings" with a close button (X) in the top right corner. The dialog is divided into several sections:

- Text Attributes:**
 - Text Angle: 0.000000
 - Text Height: 0.250000
 - Text Aspect: 0.750000
 - Line Spacing %: 0.250000
 - Text Slant: 0.000000
 - Text Justification: Left Justified, Center Justified, Right Justified
 - Text Path Direction: LeftToRight, UpAndDown, RightToLeft, DownAndUp
 - Horizontal Anchor: Left, Center, Right
 - Vertical Anchor: Top, Middle, Bottom
 - Text Mirrored
 - Text Filled
 - Text Underlined
 - Text Strike Through
- Entity Attributes:**
 - Text Color: 0
 - Fill Color: 65280
 - Pen Number: 1

Here is some additional help; items that are self explanatory are not listed.

Text Attributes:

All the different settings that can be applied to the imported text.

Entity Attributes:

Fill Color, Line Style & Line Width are disabled for this utility.

Text Options:

Font Name: Has to be typed in manually, since there is no way of getting a Font list from your Computer via KXL.

Creation Level: Enter the Level Number you want the Note/Label to be created on.

System Settings (Button):

Populate all settings with the current system settings of KeyCreator.

Import Note (Button):

Press to import the text file of your choice.
